This second edition of '320 Single Best Answer Questions for Final Year Medical Students' is an invaluable resource for medical students preparing for their final examinations. Additionally, the breadth of topics covered and detailed answers expands the versatility of this book to a larger audience including doctors preparing for postgraduate exams and other allied healthcare professionals who will be examined in general internal medicine. This improved edition contains updated and new questions that are in line with the most recent developments in clinical guidelines as well as being written in accordance with the recent changes to medical school examinations. The 320 questions are divided into 11 commonly tested areas of medicine, surgery and sub-specialities. They are designed to provide a comprehensive coverage of the medical school curriculum and to allow practice by speciality or random selection. The questions are written in the format of medical final examinations. The answers provide detailed explanations as to how the correct answer is reached, followed by a clear discussion of how the incorrect answers are ruled out and supplementary information about other important aspects of each question. The answers are designed to allow the reader to further enhance their clinical knowledge, understanding and single best answer technique, thus making this book an excellent aid for exam preparation. About 550 registrants from 51 different countries attended the Seventh Ottawa Conference on Medical Education and Assessment in Maastricht. We received 525 abstracts for the conference,

divided in thematic poster sessions and platform presentations. Organising the conference was an honour and we tried to meet the high standards of a friendly and relaxed atmosphere which has characterized previous Ottawa conferences. During and after the conference about 250 papers were submitted for publication in the conference proceedings, leaving us little time for a post-conference depression. Despite the large number of papers, the editors have attempted to review and edit the papers as care fully as possible. Occasionally, however, correspondence exceeded reasonable deadlines, preventing careful editing of a small number of the papers. Although we felt that our editorial task was not quite finished, we nevertheless decided to include these papers. We thank the many authors for their enthusiastic and prompt response to - occasionally tedious - editorial suggestions and requests. We are sure that this collective effort has resulted in a book that will make an important contribution to the field of medical education. The editors want to thank Jocelyn Flippo-Berger whose expertise with desk top publishing and perseverance was a great help.

You've read your textbook and your course notes. Now you need to apply your knowledge to real life clinical situations. Core Clinical Cases guides you to think of the patient as a whole, rather than as a sequence of unconnected symptoms. With its practical approach strongly linked to underlying theory, the series integrates your knowledge with the realities of managing clinical problems, and provides a basis for developing problem-solving skills. The core areas of undergraduate study are covered in a logical sequence of learning activities: each case is followed by a detailed answer, along with a number of OSCE-style questions to help you practise for the exam. Related OSCE counselling style questions and answers also feature at the end of each section. Key concepts and important information are highlighted, and the reader-friendly layout reflects exactly the type of question you will encounter, making the perfect revision aid for all types of case-based examination.

The comprehensive volume, General Medicine and Surgery, focuses on the following topics:

Real-world scenarios help you develop clinical reasoning skills for primary care! Case Studies in Primary Care: A Day in the Office, 2nd Edition includes 50 case studies on the most commonly encountered situations in primary care. Demonstrating the kinds of health problems that a Nurse Practitioner or Physician Assistant might see during a typical clinical day, case studies cover patients from various cultures and all ages. You're asked to analyze data and think critically in reaching accurate diagnoses and planning effective treatment; you can then submit your responses online for grading and instant feedback. Real-world scenarios offer the opportunity to analyze clinical situations likely to be encountered in today's primary care settings, providing practice in clinical reasoning skills. Day in the Office format presents cases hour by hour, in the way a typical clinical day might unfold. Emphasis on problem-based learning helps you to think critically and analyze

clinical situations — such as ear infections, diarrhea, and coughing and fever — in order to provide appropriate primary care. Six NEW cases are included (for a total of 50), with three focusing on older clients with more complex health challenges, one addressing unplanned pregnancy, and two addressing practice management issues. NEW! Emphasis on follow-up care addresses patients coming to the primary care setting from retail clinics, rehabilitation settings, or acute-care settings, and underscores the importance of interprofessional collaboration. NEW! Enhanced patient diversity includes cases for all age groups, and reflects a more contemporary appreciation of cultural diversity

and gender/gender identity. NEW! Updates to all cases ensure that case studies and feedback are consistent with the latest research evidence, clinical practice guidelines, and national and international treatment standards. NEW! Online answer submission allows you to write Assessment and Plan answers in the printed book, then submit answers online for grading and feedback. NEW! Grading rubrics are provided on the companion Evolve website to help you develop your answers. NEW! Introduction explains how to get the most out of the book.
