The Institute of Medicine's Roundtable on Value & Science-Driven Health Care held a workshop, titled Partnering with Patients to Drive Shared Decisions, Better Value, and Care Improvement, on February 25 and 26, 2013. The workshop, supported by the Gordon and Betty Moore Foundation and the Blue Shield of California Foundation, focused on identifying and exploring issues,

attitudes, and approaches to increasing patient engagement in and demand for the following: shared decision making and better communication about the evidence in support of testing and treatment options; the best value from the health care they receive; and the use of data generated in the course of their care experience for care improvement. The workshop hoped to build awareness and demand from patients and families for better care at lower costs and to create a health care system that

continuously learns and improves. Participants included members of the medical, clinical research, health care services research, regulatory, health care economics, behavioral economics, health care delivery, payer, and patient communities. Partnering with Patients to Drive Shared Decisions, Better Value, and Care Improvement Workshop Proceedings offers a summary of the 2-day workshop including the workshop agenda and biographies of speakers. When a bus driver takes a break in this hilarious Caldecott Honor-winning picture book, he gives the reader just one instruction: "Don't let the pigeon drive the bus!" But, boy, that pigeon tries every trick in the book to get in that driving seat: he whines, wheedles, fibs and flatters. Will you let him drive? Told entirely in speech bubbles, this brilliantly original and funny picture book demands audience participation!

Now in paperback, with a new foreword by Fred Krupp, an expert's illuminating preview of the cleaner, lighter, smarter cars of the future. In *Driving the Future*, Margo T. Oge portrays a future where clean, intelligent vehicles with lighter

frames and alternative power trains will produce zero emissions and run at 100+ mpg. With electronic architectures more like those of airplanes, cars will be smarter and safer, will park themselves, and will network with other vehicles on the road to drive themselves. As the director of the EPA's Office of Transportation and Air Quality, Oge was the chief architect behind the Obama administration's landmark 2012 deal with automakers in the US market to double the fuel efficiency of their fleets and to cut greenhouse gas emissions in half by 2025. This was America's first formal climate action using regulation to reduce emissions through innovation in car design. Offering an insider account of the partnership between federal agencies, California, environmental

groups, and car manufacturers that led to the historic deal, Margo discusses the science of climate change, the politics of addressing it, and the lessons learned for policy makers. She also takes the reader through the convergence of macro trends that will drive this innovation over the next forty years and be every bit as transformative as those wrought by Karl Benz and Henry Ford. Driving the Future is for anyone who wants to know what car they'll be driving in ten, twenty, or thirty years—and for everyone concerned about air quality and climate change now.

Did You Know That Texting While Driving Increases Your Risk of a Car Accident by 23 Times? Or that the average duration of distraction was a staggering 135 seconds? Sadly, new, teenage drivers are most at risk for fatal car accidents for two main reasons: Their inexperience driving (which leads to hasty, poor decisions), and Peer pressure from friends (which causes them to make dumb, reckless decisions) They need to

understand how to drive safely right from the start, and this book will help you do just that. In fact, we'll detail 49 expert tips, tricks, and advice that any driver--new or old--should be aware of before hitting the road. But, first... Who I Am, Why Listen To Me... My name is Damian Brindle. I'm a longtime survival blogger with many thousands of readers. I've spent the past decade studying and discovering nearly everything I can about survival, especially at home preparedness, to ensure my own family's survival. Over the last several years I've dedicated my life and my time to helping others just like you better survive disasters of all kinds. Like I said, it's my life. I'm also husband to a wonderful wife and father to two growing boys (one of whom is about to become a new

driver)... as well as a devoted Christian and fellow Patriot. I've spent years ensuring my family will be 100% safe, secure, and ready for disasters of all kinds and now I'm offering you the chance to take an important--even crucial--action for yourself by ensuring your new, teenage driver is ready for the road as well. Here's What's Covered Inside... The Most Dangerous Driving Times, Days, and Situations (some of these might surprise you) 5 Actions You Should Always Do Before Driving Off (how spending 15 seconds now can save your life) Why Not Speeding is Much More Than Avoiding Speeding Tickets (and why it doesn't actually save time) What NOT to Do While Driving (you'd be surprised at how much safer you'll be) 11 More Common-Sense Safety Tips to

Know (these could keep you the safest of all) Why Semi-Trucks and Other Large Vehicles Deserve Special Attention (hint: they always win car accidents) How to Really Get Your Car Ready for the Road (most people ignore these to their detriment) Why You Must Start Educating Them Now... Young adults think they know everything, they think they're invincible, and they think that nothing bad will ever happen to them. You and I both know that's not true. You simply MUST prepare your new, teen driver to be as safe as possible while you still have the opportunity to do so... here's how to educate your teen to drive safely on the road right from the start. knowledge instantly delivered to your fingertips only moments from now. Don't wait. Discover how to stay safe on the road and to give your teen the best chance of surviving the road. Scroll Up And Click The "Buy Now" Button

Why We Drive National Academies Press

With glorious photography and sharp writing, *Never Stop Driving* presents the case for the mental and social benefits of driving and engaging with automobiles. It also shows you—from dreaming about a car to living with it—how to jump in and get the most from your machine. There's never been a better time to go for a drive. As a nation, we are chronically overstressed, overworked, and not sleeping enough. Worse yet, our digital devices are taking

ever increasing chunks of what remaining free time we do have. Activities that force us to engage with ourselves and the environment around us are needed more than ever. Might I suggest a spin in a four-wheeled escape pod? The car—the act of driving, repairing, maintaining—drives out distraction and demands we be “present.” Making the car a pursuit invites not just the freedom of the road, but the potential to connect with thousands of like-minded individuals as well as the pleasure of simply caring for the machine. Further, there's the thrill of commanding an object that represents a high point of human ingenuity and design. Cars invite passion. The first step is embracing the itch and acting on it. Learn how to choose your perfect

weekend car, hunt for it, and make the deal. Then, find peace in the wrenches with tips on taking the plunge into maintaining your ride, including how your car can be an opportunity to tear your kids away from their screens and strengthen your bond with them. Next, explore the joy of driving, from scenic byways to taking your car to its performance limit. You'll also tour the various highlights of the driving life, like how to become an automotive archaeologist, the possibilities for those short on cash but high for adventure, the car as a social gathering point, and what the future with autonomous cars means for those who love to drive. Never Stop Driving shines some light on why we find these machines so captivating, offering some inspiration and validation, and

finally inviting those who are curious but haven't made the leap to get in the car. Let's roll.

Charting the 130-years from the arrival of horseless carriages to the advent of driverless vehicles, celebrate the automobile and the romance of the open road. Beginning with the development of the first vehicles powered by an internal combustion engine, Drive explores the early glamour of driving, motor sport, and car design, and looks at how the automobile has shaped the modern world. Revealing the advances in technology and design that have made cars faster, safer, and better to drive, and transformed them from a means of transportation into objects of status, excitement, and desire, Drive tracks trends in auto manufacturing and the

public's changing tastes in cars: whether it's Golden Era sports cars such as the MG, Alfa Romeo, Jaguar, and Chevrolet, muscle cars like the Mustang, hot rods, custom cars, the hippie-standard VW, or modern-day hybrid cars. Trivia and fascinating facts covering the growth of car racing, the development of traffic lights, the boom in automobile advertising, the first car washes, and the craft of artisan-made cars complete the subject, making it a must-have for car enthusiasts.

The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards

like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising

techniques for putting these into action in a unique book that will change how we think and transform how we live.
