In recent years, peace psychology has grown from a utopian idea to a means of transforming societies worldwide. Yet at the same time peacebuilding enjoys global appeal, the diversity of nations and regions demands interventions reflecting local cultures and realities.

Peace
Psychology in

Asia shows this process in action, emphasizing concepts and methods diverging from those common to the US and Europe. Using examples from China, India, Indonesia, the Philippines, and elsewhere in the region, chapter authors illuminate the complex social, political, and religious conditions that have fostered war, colonialism, dictatorships, and ethnic strife, and the equally

intricate personal and collective psychologies that need to be developed to encourage reconciliation, forgiveness, justice, and community. Peace Psychology in Asia: Integrates psychology, history, political science, and local culture into concepts of peace and reconciliation. Highlights the indigenous aspects of peace psychology. Explains the critical relevance of local culture

and history in peace work. Blends innovative theoretical material with empirical evidence supporting peace interventions. Balances its coverage among local, national, regional, and global contexts. Analyzes the potential of Asia as a model for world peace. As practice-driven as it is intellectually stimulating, *Peace Psychology in Asia* is vital reading for social and

community psychologists, policy analysts, and researchers in psychology and sociology and international studies, including those looking to the region for ideas on peace work in non-Western countries.

This book discusses the epistemic foundation of the heuristic construct 'vagabond' and the convergence

between the politics of itinerancy and that of dissent in the context of South Asia. It describes the fraught relationship between 'native' itinerant practices and techniques of governmentality which have furnished different categorizations and taxonomies of mobility. The book demonstrates the historical seismic breaks – from the Orientalist to the post-Orientalist, from the premodern to

the modern, and from the colonial to the post-colonial - in the representation of the vagabond in the juridico-political imagination, in historiography and cultural articulation. For instance, the drunk European sailor, the quasi-religious mendicant, and the helpless famine refugee have all been referred to as 'vagabonds' in the colonial archive. This book examines the

histories and conditions behind these conceptual overlaps, as well as the uncanny associations among categories that uneasily coexist and mirror each other as subsets of a vast range of phenomena, which may loosely be called 'vagabond(age)'. This volume will be of interest to students and researchers of literature, cultural studies, colonial and post-colonial studies,

history, migration studies, sociology, and South Asia studies. *Disability in South Asia* McGraw-Hill Companies "This book is designed to help students organize their thinking about psychology at a conceptual level. The focus on behaviour and empiricism has produced a text that is better organized, has fewer chapters, and is somewhat shorter than many of the leading books. The beginning

of each section includes learning objectives; throughout the body of each section are key terms in bold followed by their definitions in italics; key takeaways, and exercises and critical thinking activities end each section"-

Snell's Clinical Neuroanatomy , Eighth Edition, equips medical and health professions students with a complete, clinically oriented understanding of neuroanatomy . Organized classically by system, this revised edition reflects the latest clinical approaches to neuroanatomy

structures and reinforces concepts with enhanced, illustrations, diagnostic images, and surface anatomy photographs. Each chapter begins with clear objectives and a clinical case for a practical introduction to key concepts. Throughout the text, Clinical Notes highlight important clinical considerations . Chapters end with bulleted key concepts, along with clinical problem solving cases

and review questions that test students' comprehension and ensure preparation for clinical application. An Exploration with DSM-5 Update Routledge This book critically examines the cultural politics of visuals in South Asia. It discusses themes such as the vernacular visual and ways of seeing; photography and anthropology; refugee representation; and

television news practices to explore modernity and tradition, fluidity and hybridity, and political economic and performative politics. **Second South Asia Edition E-Book** Taylor & Francis This fascinating volume offers a transdisciplinary and transcultural approach to understanding the senses by exploring themes in anthropology of sound, sight, smell,

taste, touch, and movement as expressed through aesthetic, perceptual, religious, and spiritual experiences. In drawing upon comparative perspectives from Indian and Western theories, the essays demonstrate the integral relation of senses with each other as well as with allied notions of the body, emotion and cultural memory. Stressing the continued relevance of

senses as they manifest in a globalized world under the influence of new media, this work will interest scholars of anthropology, cultural studies, sociology, ritual studies, psychology, religion, philosophy, and history. *Psychology* Pearson Higher Ed Outstanding and original, this book by Dr. Anvita Madan-Bahel (PhD, Columbia University) integrates the current theory and literature

on South Asians and engages the reader in meaningful ways. There are few studies in Asian/Asian American studies and in psychology (as well as other fields such as cultural studies, film, etc) that address the spectrum of topics included in this creative, thoroughly researched and well-written book. This book will be a valuable reference for those in many disciplines,

including Psychology, Asian Studies and Women's Studies. "In this seminal piece, Dr. Madan-Bahel uses Bollywood film clips to foster thinking and discussion on critical topics in sexual health for South Asian female youth. This work is unique and innovative in many key ways. ... Dr. Madan-Bahel offers a variety of recommendations for practice, research, and policy that will continue to

influence the field for years to come. This is impressive, inspirational, and groundbreaking work!" - Christine J. Yeh, Associate Professor of Counseling Psychology, University of San Francisco
The Vagabond in the South Asian Imagination
 iUniverse
 The History of the Book in South Asia covers not only the various modern states that make up South Asia today but also a multitude of languages and

scripts. For centuries it was manuscripts that dominated book production and circulation, and printing technology only began to make an impact in the late eighteenth century. Print flourished in the colonial period and in particular lithographic printing proved particularly popular in South Asia both because it was economical and because it

enabled multi-script printing. There are now vibrant publishing cultures in the nation states of South Asia, and the essays in this volume cover the whole range from palm-leaf manuscripts to contemporary print culture.
The International Journal of Indian Psychology, Volume 7, Issue 1, Version 1
 Routledge
 Gray's Anatomy for Students is a clinically oriented,

student-friendly textbook of human anatomy. It allows students to learn anatomy within the context of many different curricular designs, and within ever-increasing time constraints. The artwork in this textbook presents the reader with a visual image that brings the text to life and presents views that will assist in the understanding and comprehension of the anatomy.

Each regional anatomy chapter consists of four consecutive sections: conceptual overview, regional anatomy, surface anatomy, and clinical cases. The Second South Asia Edition of this textbook has two volumes: Volume One—The Body, Upper Limb, Lower Limb, Abdomen, Pelvis and Perineum; and Volume Two—Thorax, Back, Head and Neck, and Neuroanatomy

. New content has been added on the basis of updates in the Fourth International Edition, including the addition of a new chapter on neuroanatomy. The innovative features of the First South Asia Edition such as Set Inductions, Outlines, and Flowcharts have been improved. Students are encouraged to use online resources available on MedEnact. A unique feature of this edition

is that each chapter contains line diagrams, abbreviated as LDs, along with questions and answers. These line diagrams are sketches which are easy to draw during an examination and can help students to acquire anatomical concepts and do well in assessment. The questions and answers facilitate learning. Competencies have been added in all the chapters since the curriculum is

becoming competency based. Psychology in Southeast Asia Lippincott Williams & Wilkins The Southasian Sensibility: A Himal Reader is a collection of representative , seminal articles published over the past 25 years in Himal Southasian, Southasia's first and foremost regional news and analysis magazine. The essays are fine examples of long-form journalism, a format that

Himal has pioneered in the Subcontinent. Marking the quarter century of the magazine, the Himal Reader argues for a regional mindset when tackling issues that touch the people of the Subcontinent. The focus throughout is for a humanist and progressive viewpoint, with a strong emphasis on human rights, democracy and social justice. The selected articles, whether discussing

<p>nationalism, regionalism, insurgency or cultural transformation , all reflect one aspect that Himal has striven to promote throughout its existence: a perspective that views the entire Southasian region as a single, composite entity even while respecting the plurality and integrity of its component parts.</p> <p><i>Introduction to Psychology</i> Pearson Education India This book</p>	<p>documents and analyzes the effects of the COVID-19 pandemic through queer and feminist perspectives. A testament of dispossessions as well as a celebration of various forms of resilience, community building and critical responses, it chronicles the social history of queer and trans persons and women in South Asia and the diasporas. Through a creative and collaborative form of ethnographic writing, the</p>	<p>book enters in conversation with the worlds of domestic helps, caregivers, cultural workers, students, sex workers and other precariously employed people. It examines the confining effects of the pandemic on the lived realities of many queer and trans individuals, the caste-oppressed and women across socio-economic backgrounds. The chapters in the volume</p>
--	---	---

piece together narratives of prejudice, hardship, self-expression and resistance from interviews, personal accounts, as well as poems and stories from activists, artists and other collaborators. The book pays particular attention to issues of power and asymmetrical relationships amidst COVID-19 and offers critiques to deepen the understanding of the uneven fault lines within which

historically oppressed persons reside in South Asia. Exploring themes of migration, disability and sexual politics, this book is an essential reading for scholars and researchers of gender and sexuality studies, cultural studies, South Asian studies, sociology and social anthropology. *Implications for Mental Health and Well-Being* Routledge The Second Edition of the Handbook of Asian

American Psychology fills a fundamental gap in the Asian American literature by addressing the full spectrum of methodological, substantive, and theoretical areas related to Asian American Psychology. This new edition provides important scholarly contributions by a new generation of researchers that address the shifts in contemporary issues for

Asians and Asian Americans in the U.S.

Issues in Clinical Psychology, Psychiatry, and Counseling: 2011 Edition

Routledge

This book draws upon new theoretical insights and fresh bodies of data to historically reappraise partition in the light of its long aftermath. It uses a comparative approach by viewing South Asia in its totality, rather than looking

at it in narrow 'national' terms. As the first book to focus on the aftermath of partition, it fills a distinctive niche in the study of contemporary South Asia.

Introduction to Psychology

Taylor & Francis

"The authors are to be commended for a book which should be very helpful for mental health professionals taking care of South Asian patients. The book uses case histories to illustrate a

range of issues, which may come up in the treatment of this ethno-cultural group. The cases cut across genders, age groups, socioeconomic groups, diagnostic categories, and other clinical matters pertaining to abuse and domestic violence among South Asians born in South Asia and in the United States. The cases illustrate issues related to immigration,

acculturation, stigma, access to care, and familial and intergenerational problems. The cases make teaching points about the impact of culture on clinical presentation and treatment, focusing on how culture and religion can be both a hindrance and an asset. The authors describe how to use cultural understanding in diagnosis and treatment” (Iqbal Ahmed MD, FRCPsych,

UK). *Interdisciplinary Approaches* Elsevier Health Sciences Despite diverse, rich cultural traditions and abundant economic opportunity, there has been a paucity of research on psychology in Southeast Asia. This book aims to fill that gap, with a series of well-written theoretical and empirical chapters by PhD psychologists in SE Asia along with respected international

colleagues and co-authors from around the globe. In particular this book focuses upon critical sociocultural, clinical, and health issues and perspectives in psychology in Southeast Asia. Overviews help contextualize the cultural data, permitting nuanced examination of significant psychological issues in nations such as Malaysia, Indonesia, Thailand, Singapore,

and more. Psychologists and mental health professionals with interests in Asia will find this book to be a must-read, as will other readers seeking to deepen their cultural and international understanding .

The Routledge Atlas of South Asian Affairs

Routledge

This is the first textbook written to welcome those who are new to Asian American psychology. Concepts and theories come to life by

relating the material to everyday experiences and by including activities, discussion questions, exercises, clinical case studies, and internet resources.

Contributions from the leading experts and emerging scholars and practitioners in the field - the majority of whom have also taught Asian American psychology - feature current perspectives and key

findings from the psychological literature. The book opens with the cornerstones of Asian American psychology, including Asian American history and research methods. Part 2 addresses how Asian Americans balance multiple worlds with topics such as racial identity, acculturation, and religion. Part 3 explores the psychological experiences of Asian Americans

through the lens of gender and sexual orientation and their influence on relationships. Part 4 discusses the emerging experiences of Asian Americans, including adoptees, parachute kids, and multiracial Asian Americans. Part 5 focuses on social and life issues facing Asian Americans such as racism, academic and career development. The text concludes

with an examination of the physical and psychological well-being of Asian Americans and avenues for coping and healing. This ground-breaking volume is intended as an undergraduate/beginning graduate level introductory textbook on Asian American psychology taught in departments of psychology, Asian American and/or ethnic studies, counseling,

sociology, and other social sciences. In addition, the clinical cases will also appeal to clinicians and other mental health workers committed to learning about Asian Americans. **Exploring South Asian Urbanity** RED'SHINE Publication. Pvt. Ltd. Food practices of a people is the product of multiple factors. Endogenous as well as exogenous factors influence people's

opinion and preferences about food. In India and its neighbouring countries, food practices are often delimited by economic standing, religion, caste and analogous systems of social ranking of the consumers. State and market forces also influence food behaviour by exercising control over production and trade. Food and Power: Expressions of Food-Politics in South Asia studies power

relations between those who eat and those who decide (or at least try to decide) what people should eat. It raises questions pertaining to the politicization of ethnographic tradition in South Asia in relation to the intersection of religion, economy and food. This book explores how traditional food practices have undergone change owing to the influences of migration

globalization and popular media to understand how ethos of the powerful affects the foodways of relatively weaker ethnic, religious, occupational and gender groups

South Asian Mental Health Spotlighted

Pearson Education India

Disability in South Asia: Knowledge & Experience presents a comprehensive approach to various aspects of disability in South Asia. A

critical work on disability studies, this book explores the full complexity of disability in its multi-layered, interactional dynamics. The book imparts understanding of the social, political and cultural construction of disability as opposed to the traditional perception of disability in terms of medical condition, biological trait, rehabilitation and special education. It focuses on foregrounding disability

across various areas including education, law and sociology, critically exploring the interaction of gender and disability, and challenging the separation between theory and practice as well as academia and activism. The book shows how the inclusion of a disability perspective enriches scholarship by contributing to the understanding of social marginalization, oppression and the

perception of difference. It highlights the lived experiences of people with disabilities to help readers develop a nuanced comprehension of disability. [Routledge Handbook on South Asian Foreign Policy](#) Routledge This book looks at the typologies of cities and ideas of urbanity. Focusing specifically on cities in South Asia, it analyses the unique planning concepts, archaeology,

art, culture, life, and philosophy of various cities of ancient and modern South Asia. The book explores the concept of urbanity and the idea of an ideal city; it interrogates general notions of urbanity by juxtaposing city life in various periods and geographies of South Asia. By analysing the demography, architecture, rituals, and culture of various cities, it looks at the different spatialities of

these places in terms of their size, population, commerce, and philosophy as well as the reasons behind the transformation of these places into urban centres. Drawing from various archeological and literary sources, the volume includes rich details about heterogeneity, rituals, festivals, social stratification, penal systems, famines, and insurrections in ancient

cities as well as modern cities like Lahore, Dhaka, and Calcutta, among many others in South Asia. This book will be of interest to researchers and students of ancient and modern history, archaeology, urban studies, urban and town planning, urban sociology, urban geography, cultural studies, post-colonial studies, ancient and medieval architecture, heritage

studies,
conservation

studies, and

South Asian
studies.
