\* An exhaustive appraisal of the Rolex watch, including studies of vintage models, current designs and special editions\* Learn how to spot fakes using the same clues as the experts\* Invaluable to any watch-lover, especially aspiring Rolex collectorsHorological trends flit by faster than ever in today's fast-paced society. But Rolex does not rely on gimmicks; theirs is a more perennial allure, with a reputation built on traditions and hard-earned skill. A company that innovates while paying homage to their roots, every Rolex is the cumulation of centuries of watchmaking expertise. Within this book you will find explanations of the making process, descriptions of the materials involved and expert commentary on what makes each Rolex wristwatch unique. The Book of Rolex demonstrates how each model fits its social milieu, present and past. It also addresses the multitude of fakes on the market, including the so-called 'Frankensteins' - watches made from a mixture of real parts and forgeries, which are notoriously hard to spot - imparting all the skills needed to pick counterfeits out of a line-up. A holistic view of Rolex watches, this book promises to be as timeless as the brand itself. Should you be considering a Rolex, this book will convince you of its worth as an

investment.

The brand with the crown is recognized worldwide as an invaluable sports implement and luxury product. In little more than one hundred years, it has become one of the most successful and innovative watch brands on the planet. Rolex manufactures more than a half a million wristwatches per year while maintaining an outstanding reputation and near-perfect quality. From the beginning, the sponsorship of statesmen, movie stars, and athletes has driven its success, but the company has expanded to include more than just the rich and famous. The Rolex Oyster became the first watch to defy the elements when, in 1927, Mercedes Gleitze wore one while she swam the English Channel. In 1933, the company patented the first automatic winding mechanism. Learn more about this history and read updated reports written about new Rolex ideas and performance tests featured in the German watch magazine *Armbanduhren* (Wristwatch) from the past 15 years.

**An Unauthorized History** Simon and Schuster

Chris Payne writes a hilarious surreal account of life as a university professor at a dysfunctional university in the Turkish Republic of Northern Cyprus. On the beautiful island of Cyprus, little works as you expect it to, from the primitive plumbing to the maniacal university bus service. The American Institute of Cyprus is a seat of higher learning like no other. The place is chaotically organised for the students who attend class only if they feel like it. They cheat on their exams, photocopy textbooks illicitly with university approval, and deliberately fail their courses to avoid military service. Meanwhile, the management spends its time devising all sorts of ingenious money-raising scams and schemes to cheat students and teachers alike, while the AIC owners business strategy is to sell as many university degrees as he can alongside his cake shops and motorcycle franchises. But then, as everyone says, this is Cyprus, an Edenic Mediterranean paradise where everyone is on the make and the only guiding principle is money is money.

**PRESENTATION: HOW TO KNOW EVERYTHING ABOUT THE ROLEX GMT-MASTER** The GMT-Master was created to meet the needs of Pan American Airways to supply its pilots with a wristwatch able to indicate the time back home and the time in their arrival destination simultaneously. It was necessary to give the pilots a "technical" wristwatch, which indicated simultaneously the two different times. It is from this point that the request arose from Pan Am to Rolex, to create a new watch for modern age aviators: a watch with two time zones. The name GMT-Master was chosen... Are you a watch collector and you need information about the Rolex GMT-Master? Are you a watch dealer and you want to know exactly what you are buying and selling? Do you want to know the real value of your GMT-Master? For all this and much much more, this book is perfect for you. You will also know the current value of every GMT-Master. **TOPICS** With high quality images, technical details and updated prices, this book shows and describes every GMT-Master and GMT-Master II reference. For each watch this guide explains every characteristic: crystal, bakelite bezel, anodized aluminium bezel, Cerachrom bezel, bracelet, case back, winding crown, case number with production year, dial, movement, hands, etc. Furthermore, the book shows: "Albino", bachelite, "Batman", bracelets, calibers, "circular" indexes, "circular edged" indexes, "Cornino" crown guards, "standard" crown guards, GMT hand with small arrow, Green Dial, Oysterlock, sunken holes, vintage advertisements, Underline, box, papers, the "Ice" model, "Chuck Yeager", "Tiffany & Co.", "Mission Everest", dials with Arab coats of arms, ... Servlets and JSP (Java Server Pages) are the main way that Java is used in the Web today. These are Java programs that run on a Web server that allow HTML content to be dynamically generated (often by querying a database) and then sent via the web to a

"client" machine that made the request in the first place. Jorelid's book concentrates on teaching the program architect and designer how to fit the various pieces together, spending as little time as possible on the mechanics of coding. As the tech reviewer puts it, "Jorelid's perspective is unique and not voiced in any of the popular Servlet books (such as the ones by Jason Hunter, Marty Hall, Calloway, etc). The code examples in the touring the package sections nicely explain how to use the important methods in the Servlet API. I have yet to see any existing books get into these useful details."

INTERNATIONAL BESTSELLER "For anyone who wants to understand capitalism not as economists or politicians have pictured it but as it actually operates, this book will be invaluable."-Observer (UK) If you've wondered how we did not see the economic collapse coming, Ha-Joon Chang knows the answer: We didn't ask what they didn't tell us about capitalism. This is a lighthearted book with a serious purpose: to question the assumptions behind the dogma and sheer hype that the dominant school of neoliberal economists-the apostles of the freemarket-have spun since the Age of Reagan. Chang, the author of the international bestseller *Bad Samaritans*, is one of the world's most respected economists, a voice of sanity-and wit-in the tradition of John Kenneth Galbraith and Joseph Stiglitz. *23 Things They Don't Tell You About Capitalism* equips readers with an understanding of how global capitalism works-and doesn't. In his final chapter, "How to Rebuild the World," Chang offers a vision of how we can shape capitalism to humane ends, instead of becoming slaves of the market.

Libraries as a building type have been subjected to substantial changes in particular in the past ten years. Milestones such as Rem Koolhaas' Seattle Central Library from 2004 reinvented the typology completely and reflected a development from elitist temple of learning to a public living room. Hybrids between library and department store or theater were conceived. Today, the ubiquity of electronic devices and media needs to be taken into account by the designer: every new library has areas without any books now. This work of reference explains systematically all technological and planning requirements of library design. Special features such as RFID, signage, acoustics or specific structural load issues are explained in texts by experts from the fields of architecture and library science. Finally, approximately 40 best-practice case studies of contemporary library design are

documented extensively. They are organized in four categories - national libraries, large public libraries, small public libraries, university libraries - and comprise high-profile examples such as Jo Coenen's Openbare Bibliotheek Amsterdam, Alvaro Siza's Public Library Viana do Castelo in Portugal or Mecanoo's Library of Birmingham from 2013.

"Rolex was established in 1908, a century ago, so one hundred years have passed from that day to the publication of this volume in which the author, John Goldberger, illustrates what he considers to be the 100 most beautiful examples ever produced. One hundred years of life, and one hundred examples, traced back through time thanks to painstaking research, with the collaboration of some of the most renowned collectors in the world, and photographed to show the characteristics of the movement, case and dial of each example in the best possible way. The top one hundred, we could say, also to narrow down the field of research, which would otherwise have been incredibly vast, to grasp the essence of a brand that has probably contributed more than any other to the development of the wristwatch. Giampiero Negretti Over 700 colour illustrations and 400 descriptions provide the collector and watch enthusiast with invaluable information on reference numbers, watchcases, faces, movements, related calibres and the year of production of each watch. The book is divided into seven chapters: Watches with a destiny; Oyster; Chronograph and moon phases; Oyster chronograph and moon phases; Datejust, Day-Date; Sport Models; Cosmograph."--BOOK JACKET.
