Mastering Financial Accounting Essentials Sultan Chand & Sons

Finance and accounting are at the heart of every business. Even if your role isn't directly focused on finance, your activities have financial implications. Understanding how money flows through your organization empowers you to make better decisions and identify profitable solutions. In this course, you'll learn about basic accounting concepts and principles and walk through the four-step accounting process. You'll also learn the fundamental principles of cash flow management and cover the four types of financial risk. It's not only the folks in the finance department who have to plan and monitor budgets. It's actually in everyone's best interest to have some basic budgetary knowledge. In this course, you'll learn about planning an effective budget, the stages involved, and different

types of budgets. You'll also be introduced to Historical and Zero-based budgeting, variance analysis, capital budgeting, and performing budgeting calculations. To maintain your company's finances, you need a handle on the Income Statement, Cash Flow Statement, and Balance Sheet. And if you want to improve your company's finances, financial statements will hint at problems and possible solutions. This course will give you an overview of the three statements. You'll learn which items are included in each statement, how the statements are interlinked, and what each one indicates about your company's financial position. Financial analysis helps you understand your organization's financial standing, how it got there, and its strengths and weaknesses. In this course, you'll learn about the concept of the Time Value of Money as well as the methods for analyzing financial statements from a non-financial professional's perspective. These methods include using profitability ratios for analysis; analyzing Efficiency Ratios; Liquidity Ratio analysis; analyzing Solvency Ratios; and Vertical and Horizontal analysis.

Fundamental Managerial Accounting Concepts 7e by Edmonds/Tsay/Olds focuses on concepts that are isolated and introduced in a logical sequence. The authors intentionally limit the scope of the material to help students build a solid foundation of the most important concepts in managerial accounting. *Fundamental Managerial Accounting Concepts 7e* is organized in a distinctive way, particularly in the first six chapters. The objective is to establish a coherent, integrative framework that enables students to build knowledge in stepwise fashion. The authors' goal is for students to understand the underlying principles of accounting, not just memorise content.

Students are often overwhelmed by the amount of information presented in the introductory

financial accounting course. By focusing on fundamental concepts in a logical sequence, students are able to fully comprehend the material rather than memorise seemingly unrelated terms and topics. The goal of Fundamental Financial Accounting Concepts is to enable students to understand how any given business event affects the financial statements. The “financial statements model” is a highly praised feature because it allows students to visualise the simultaneous impact of business events on all of the key financial statements (the income statement, the balance sheet, and the statement of cash flows).
