The search for a means to an end to apartheid erupts into conflict between a black township youth and his "old-fashioned" black teacher.

Learning and Doing Policy Analysis in Education: Examining Diverse Approaches to Increasing Educational Access Peter Lang D

The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is

enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right. *Mabuza, Fred Daniel and the Great Land Scam* University of Natal Press
In this exciting sequel, April O'Connell continues to capture the essence of adventure as she pulls you back into the wilds of the jungle as Zura has grown into a strong woman and has taken on the

challenges of raising a family.

Inadequate electricity services pose a major impediment to reducing extreme poverty and boosting shared prosperity in Sub-Saharan Africa. Simply put, Africa does not have enough power. Despite the abundant low-carbon and low-cost energy resources available to Sub-Saharan Africa, the region's entire installed electricity capacity, at a little over 80 GW, is equivalent to that of the Republic of Korea. Looking ahead, Sub-Saharan Africa will need to ramp-up its power generation capacity substantially. The investment needed to meet this goal largely exceeds African countries already stretched public finances. Increasing private investment is critical to help expand and improve electricity supply. Historically, most private sector finance has been channeled through privately financed independent power projects (IPP), supported by nonrecourse or limited recourse loans, with long-term power purchase agreements with the state utility or another off-taker. Between 1990 and 2014, IPPs have spread across Sub-

Saharan Africa and are now present in 17 countries. Currently, there are 125 IPPs, with an overall installed capacity of 10.7 GW and investments of \$24.6 billion. However, private investment could be much greater and less concentrated. South Africa alone accounts for 67 IPPs, 4.3 GW of capacity and \$14.4 billion of investments; the remaining projects are concentrated in a handful of countries. The objective of this study is to evaluate the experience of IPPs and identify lessons that can help African countries attract more and better private investment. At the core of this analysis is a reflection on whether IPPs have in fact benefited Sub-Saharan Africa, and how they might be improved. The analysis is based primarily on in depth case studies, carried out in five countries, including Kenya, Nigeria, South Africa, Tanzania and Uganda, which not only have the most numerous but also among the most extensive experience with IPPs.

From best-selling author Holly Webb

comes a brand new series full of mystery and intrigue following the adventures of a very determined heroine and her dog! Holly Webb fans will be thrilled to pieces to discover the adventures of Maisie Hitchins, the pluckiest little detective in Victorian London. Maisie Hitchins lives in her grandmother's boarding house, longing for adventure. She idolizes the famous detective, Gilbert Carrington, and follows his every case. But Maisie is about to be given the opportunity of a lifetime: her own mystery to solve! In the first book in this fantastic new series, Maisie rescues a puppy in peril whilst running an errand, and adopts him. She decides to investigate the puppy's original cruel owner, but instead gets tangled up in an intriguing plot involving stolen sausages, pilfered halfpennies and a fast-paced bicycle chase. The streets of Victorian London are never safe, but Maisie's on the case!

v. 3: The third volume in the series examines the role of anti-apartheid

movements around the world. The global anti-apartheid movement was very successful in creating awareness of the liberation struggle in South Africa, and in contributing to the downfall of the apartheid government. This volume, in 2 parts, brings together analyses which in the main are written by activist scholars with deep roots in the movements and organizations they are writing about.

A history of shoplifting, revealing the roots of our modern dilemma. Rachel Shteir's *The Steal* is the first serious study of shoplifting, tracking the fascinating history of this ancient crime. Dismissed by academia and the mainstream media and largely misunderstood, shoplifting has become the territory of moralists, mischievous teenagers, tabloid television, and self-help gurus. But shoplifting incurs remarkable real-life costs for retailers and consumers. The "crime tax"-the amount

every American family loses to shoplifting-related price inflation-is more than \$400 a year. Shoplifting cost American retailers \$11.7 billion in 2009. The theft of one \$5.00 item from Whole Foods can require sales of hundreds of dollars to break even. *The Steal* begins when shoplifting entered the modern record as urbanization and consumerism made London into Europe's busiest mercantile capital. Crossing the channel to nineteenth-century Paris, Shteir tracks the rise of the department store and the pathologizing of shoplifting as kleptomania. In 1960s America, shoplifting becomes a symbol of resistance when the publication of Abbie Hoffman's *Steal This Book* popularizes shoplifting as an antiestablishment act. Some contemporary analysts see our current epidemic as a response to a culture of hyper-consumerism; others question whether its upticks can be tied to economic downturns at all. Few provide convincing theories about why it goes up or down. Just as experts can't agree on why people shoplift, they can't agree on how to stop it. Shoplifting has been punished by death, discouraged by shame tactics, and protected against by high-tech

surveillance. Shoplifters have been treated by psychoanalysis, medicated with pharmaceuticals, and enforced by law to attend rehabilitation groups. While a few individuals have abandoned their sticky-fingered habits, shoplifting shows no signs of slowing. In *The Steal*, Shteir guides us through a remarkable tour of all things shoplifting—we visit the Woodbury Commons Outlet Mall, where boosters run rampant, watch the surveillance footage from Winona Ryder's famed shopping trip, and learn the history of antitheft technology. A groundbreaking study, *The Steal* shows us that shoplifting in its many guises—crime, disease, protest—is best understood as a reflection of our society, ourselves.

Interpellations, Questions and Replies of the National Assembly Pretoria University Law Press

This book originated in a policy analysis class at Michigan State University taught during 2010. Using Professor Tatto's unique approach to teaching policy analysis, the professor and students agreed to construct a class that represented a reflective and grounded experience in the policy analysis of a

current and relevant issue with global ramifications; we began exploring policies that were developed at the global level and that were implemented locally. We investigated the surge of globally developed standards and regulations in an effort to improve education. Our goal was to learn cross-nationally about policies that seek to reform curriculum and instruction under efficiency and global competitiveness arguments, such as Education for All (EFA) and its USA cousin No Child Left Behind (NCLB). We knew our work would be bounded by the time available in a one-semester class, and by resource constraints. We did exploratory inquiry supported by literature reviews, reports on rigorous research studies, and in one case an exploratory case study. The policies we chose to explore, such as EFA and NCLB, offered us the opportunity to examine current reform tendencies that are intended to provide access to quality education for all children, the preparation of teachers to support diverse populations, the organization of schools to accommodate these children in response to vague policy mandates, and power issues affecting the different

constituencies and stakeholders. The effects of these and other policies were difficult to track because research is scant and decisions are frequently made based on ideology or political persuasion. Our purpose was to explore the critical issues that originated such policies, and to search for documented evidence regarding policy implementation and effectiveness. We investigated the factors that seemed to interfere with successful implementation, from conceptual, theoretical, and methodological perspectives. In this class we learned that there are not ready-set frameworks for policy analysis, but rather that these have to be constructed according to the issues that emerge as policies are conceptualized and implemented to fit local contexts and needs. The book pays particular attention to the contexts of policy, including the evolving conceptualization of global and local systems of governance, knowledge regimes, and policy spaces. The book is designed for faculty and doctoral students in education who are interested in understanding diverse frameworks for policy analysis, and for those in the general public who are interested in the

policies we analyze here.

With the end of apartheid and the exciting, but elusive, advent of a new nation, South Africa is witness to the emergence of a new generation of oral historians whose aim is to develop a broader, more inclusive, and culturally sensitive understanding of the South African past. In a country still wounded by a legacy of racial discrimination, the retrieving of oral memories is a task more urgent than ever. *Oral History in a Wounded Country* shows how the cultural, political, socio-economic, and intellectual evolutions that gave birth to South Africa as we know it today affect the oral history process. It will help practitioners, whether they use oral history as one technique among others to gain a better knowledge of the past or envisage oral history as an academic discipline in its own right, to reflect critically on their practice and find better ways of handling the interview process. The challenge is to appreciate the complexity of South Africa's diverse histories, while being attentive to the

dynamics of the interview and their effect on both interviewers' and interviewees' sense of identity.

I Am Jane Penguin

In *Finding Voice*, Kim Berman demonstrates how she was able to use visual arts training in disenfranchised communities as a tool for political and social transformation in South Africa. Using her own fieldwork as a case study, Berman shows how hands-on work in the arts with learners of all ages and backgrounds can contribute to economic stability by developing new skills, as well as enhancing public health and gender justice within communities. Berman's work, and the community artwork her book documents, present the visual arts as a crucial channel for citizens to find their individual voices and to become agents for change in the arenas of human rights and democracy.

Study & Master Mathematical Literacy Grade 11 has been especially developed by an experienced author team according to the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Mathematical Literacy. The comprehensive Learner's Book includes: * thorough coverage of the basic skills topics to lay a sound foundation for the development of knowledge, skills and concepts in Mathematical Literacy * margin notes to assist learners with new concepts - especially Link boxes, that refer learners to the basic skills topics covered in Term 1, Unit 1-16 * ample examples with a strong visual input to connect Mathematical Literacy to everyday life.

A Visual Arts Approach to Engaging Social Change HSRC Press

Coal will continue to provide a major

portion of energy requirements in the United States for at least the next several decades. It is imperative that accurate information describing the amount, location, and quality of the coal resources and reserves be available to fulfill energy needs. It is also important that the United States extract its coal resources efficiently, safely, and in an environmentally responsible manner. A renewed focus on federal support for coal-related research, coordinated across agencies and with the active participation of the states and industrial sector, is a critical element for each of these requirements. Coal focuses on the research and development needs and priorities in the areas of coal resource and reserve assessments, coal mining and processing, transportation of coal and coal products, and coal utilization. This book aims to develop theoretical frameworks of the phenomena of internationalisation and globalisation and identify related ethical, moral, political and economic issues facing mathematics and science educators. It provides a wide representation of views some of which are not often represented in international

publications. This is the first book to deal with issues of globalisation and internationalisation in mathematics and science education.

The Steal

African Disability Rights Yearbook Volume 1 2013 Edited by Charles Ngwena, Ilze Grobbelaar-du Plessis, Helene Combrinck and Serges Djoyou Kamga 2014 ISSN: 2311-8970 Pages: 385 Print version: Available Electronic version: Free PDF available About the publication The African Disability Rights Yearbook breaks new ground in disability scholarship. Coming in the wake of the United Nations Convention on the Rights of Persons with Disabilities, it is the first peer-reviewed journal to focus exclusively on disability as human rights on the African continent. It provides an annual forum for scholarly analysis on issues pertaining to the human rights of persons with disabilities. It is also a source for country-based reports as well as commentaries on recent developments in the field of disability rights in the African region. Preface This is the first issue of the African Disability Rights Yearbook (ADRY). Drawing inspiration from the European Yearbook on Disability Law, it is the first

publication of its kind that focuses on Africa. It aims to bring into prominence an area traditionally neglected by both African governments and academics. Following in the wake of the adoption of the United Nations Convention on the Rights of Persons with Disabilities, it is the first peer-reviewed journal to focus exclusively on disability as human rights on the African continent. The Yearbook, which is projected to appear annually, is set out in three sections. Section A contains academic articles: Section B consists of country-based research, charting recent developments on disability rights legislation, case law and policy developments in selected African states; and Section C deals with relevant developments in the African Union (AU) and African sub-regional organisations. The 2013 Yearbook aims to set out the situation as at 31 December 2012. The publication of the Yearbook in 2013 is a milestone in the engagement on the rights of persons with disabilities by the Centre for Human Rights, Faculty of Law, University of Pretoria, under whose auspices this publication was conceived and is being produced. It marks a highlight

in the efforts taken by the Centre over the last few years to bring more academic attention to the rights of persons with disabilities in Africa. These efforts have only been possible with the support of the Open Society foundations, in particular, Open Society Initiative for Southern Africa (OSISA). Over the last years, OSISA has collaborated with the Centre for Human Rights, University of Pretoria, to strengthen the teaching and research in law faculties in the Southern Africa on disability rights. The collaboration consists of the following elements: (a) Efforts are made to assist in the building of capacity of law faculties in the region, through the attendance of the LLM (Human Rights and Democratisation in Africa) with a focus on disability rights by staff members from these law faculties, The staff members subsequently return to their faculties, institute and develop teaching on disability rights, and institutionalise faculty-based activities and 'centres' around disability rights. So far, the following faculties have participated: Universidade Eduardo Mondlane, Mozambique (Faculdade de Direito); the University of Botswana; the University of

Malawi (Chancellor College, Faculty of Law); University of Namibia; Midlands State University, Zimbabwe (Faculty of Law); University of Zambia; and University of Dodoma (Tanzania); University of Namibia. These faculties/centres have the responsibility/mandate to research on disability rights; promote awareness and sensitise key stakeholders in the population about the rights of persons with disabilities and the existing legal framework; elaborate position papers and advocate for particular legal reforms; keep record of/identify and engage in litigation of selected cases pertaining to the violation of the rights of persons with disabilities; and provide legal advice to persons with disabilities. (b) The Centre presents a one-week intensive short course on disability rights to build capacity and to disseminate information on disability rights more broadly in Africa. This course is attended by participants from all over the continent. (c) Together, the participating faculties are developing a curriculum for the teaching of an undergraduate course on disability rights at law schools in the region. (d) Academic work on and awareness about disability

rights is stimulated, in particular, through the publication of this Yearbook, an academic conference, and a first Southern African Disability Rights Moot Court Competition. This Yearbook is the accomplishment of many. It has been a project long in planning and preparation, and time consuming in execution. The publication is the endproduct of collaborations between the Centre and numerous partners, in particular (UWC). A very sincere and profound word of thanks goes to the following: The four editors: the convening editor, Prof Charles Ngwena, who joined the Centre for Human Rights last year; he worked with Dr Ilze Grobbelaar-Du Plessis (UP); Prof Helene Combrinck (UWC) and Dr Serges Djoyou Kamga (UNISA) as co-editors. It is only their dedication and devotion that has made this publication possible. Prof Ngwena was not only the convening editor, but also the editor in charge of Part A. He bore the brunt of the responsibility to keep the project going, and to inspire and lead all involved towards the ever-approaching deadline. Drs Grobbelaar-Du Plessis and Serges Djoyou Kamga took responsibility for Part B, and Prof

Combrinck for Part C. They each sacrificed enormously in terms of time and energy, in order to get to this end product. Thanks to all contributors, and all reviewers of contributions, for dedicating themselves to this thankless task. Kate Painting acted as a most appreciated editorial assistant. She meticulously followed up references, guaranteed consistency in style, and ensured felicitous language use. At the Centre, Thuto Moratuo Hlalele, Yolanda Booyzen and Kevashinee Pillay also provided logistical and other support. The Yearbook is published by Pretoria University Law Press (PULP), based at the Faculty of Law, University of Pretoria. The patient and professional contribution of Lizette Hermann is much appreciated. We also thank the members of the advisory board, who agreed to assist with the policy direction, review of manuscripts and lending credibility and lustre to this Yearbook by associating themselves with this endeavour. The Yearbook is very fortunate to have representation from all corners of the globe, including individuals and institutions at the leading edge of disability rights research, training and teaching. Lastly, to the Open Society

Foundation – and specifically OSISA – and its staff: Many thanks in particular to Louise Olivier, for her confidence, inspiration and consistent support, which took the Centre and me personally along an exciting and challenging new road; and to Louise Ehlers and Patricia Mwanyisa, who came on board later. Other Open Society staff also inspired and played important roles along the way. In line with the right of access to information and knowledge, this Yearbook is accessible freely as a free full downloadable document on the Centre’s website www.chr.up.ac.za On behalf of all those involved, and of the Centre, I wish to express the hope that this Yearbook will soon come to be regarded as an indispensable tool to understand and chart legislative and policy developments on disability rights in Africa, and that it will contribute to bridge the gap between the discourse of rights and its practical application and actual realisation. Frans Viljoen Director, Centre for Human Rights
About the editors: Charles Ngwenya is Professor, Department of Constitutional Law and Legal Philosophy, Faculty of Law, University of the Free State, South Africa.

Ilze Grobbelaar-du Plessis is a senior lecturer and holds the degrees BLuris LLB LLM LLD from the University of Pretoria. Helene Combrinck is Associate Professor at the Centre for Disability Law and Policy, University of the Western Cape. Serges Djoyou Kamgais is Senior Lecturer at TMAILI (UNISA).

The past ten years in South Africa has seen many changes in education - the creation of a single department of education; common examinations for all learners in public schools in the country, a new outcomes based education curriculum which was introduced to learners in the general education and training phase since 1998 and will be introduced to the further education and training phase from 2006. To evaluate the success of these

changes South African researchers still use the indicator of student achievement. The matriculation examination is the visible, high profile and public performance indicator. Every year parents, learners, teachers, researchers, government officials, policymakers, and the general public get involved in the debate around the matric examination with the most frequently asked questions being - Did the pass rate go up? Are standards dropping? Are the results real or have they been manipulated? How is our education system doing? Are we meeting the development goals? What should the matriculation examination of the future look like? participants from government (national and provincial), Mathematical Literacy, Grade 11 Political Conflict in South Africa
