Crowood Press  
The success of the  
previous Conferences  
on Energy from  
Biomass, held in  
Brighton 1980 and  
Berlin 1982, and the  
continued interest  
among European

countries, encouraged  
the Commission of the  
European Communities  
to organise the third  
conference on this  
area of energy  
production. It brought  
together about 500  
experts from many  
countries  
thus presenting an  
international forum for  
discussion of the most

recent advances in research and development, manufacture and industrial applications.

The need for manufacturers to meet U.S. Environmental Protection Agency (EPA) mobile source diesel emissions standards for on-highway light duty and heavy duty vehicles has been the driving force for the control of diesel particulate and NOx emissions reductions. Diesel Particulate Emissions: Landmark Research 1994-2001 contains the latest research and development findings that will help guide engineers to achieve low particulate emissions from future engines. Based on extensive SAE

literature from the past seven years, the 45 papers in this book have been selected from the SAE Transactions Journals.

The Journal of the Molly B is my personal diary of the building of my dream. The building of a boat is a simple idea but in practice is more like a labor of love, which exceeds all expectations. The task is at times an overwhelming undertaking, which is reminiscent of the insignificance one feels in the middle of that vast and seemingly endless expanse of water, called an ocean, you feel so small and so alone. You at times feel as though it's an impossible task. Without the knowledge or experience, to solve

the many problems that arise as you proceed along your course toward the completion of your vessel, you are constantly reminded of your shortcomings. I can assure you, it is not an impossible task! It took me 12 years but the Molly B is finally in the water and fulfilling our dream of living on the water. It's well worth the time and effort but you'll never finish it if you don't get started, you just have to take that first step and go for it.

MotorBoating CRC Press

Anyone who wants a cruising yacht -- can have one! Just build it yourself. You can do it, there is a multitude of help out there. All you really need is the perseverance to complete the project.

Volume I of "The Building of a Dream" covers building a model, site preparation, hull construction, and engine rebuild. 396 photographs in 148 pages illustrate every step of the process accompanied by a detailed explanation of how I did it.

The Land Rover has become an icon across the world, famed for its classic design, its practicality and its longevity. In this revised edition of his acclaimed book, first issued as *Land Rover - 60 Years of the 4 x 4* Workhouse, James

Taylor charts sixty-five years of Land Rover development in comprehensive detail, bringing the story right up to date with the latest Defender variants. Contents include: Prototypes and development vehicles; Standard production models; The special editions; Land Rovers built outside the UK; Special conversions; Military variants; The Land Rovers that never were. The first book to look at the story of the Land Rover's gradual evolution. Comprehensively researched, extensively illustrated and accessibly presented, this will be an indispensable read for all those who have an interest in the legend that is Land Rover. Superbly illustrated with 476

colour photographs. James Taylor's major specialization is the Rover company and its descendants, and he is widely acknowledged as the pre-eminent historian of the Land Rover.

The Dennis company has been building vehicles since 1895, making it the oldest continuously producing British manufacturer. From its origins in a small Guildford shop, the company has grown to become a major bus manufacturer with its products selling around the world. This book

discusses the company's highs and lows, through two world wars, challenging markets and ownership changes. It documents the vehicles produced and their innovative design features, from early cars and street-cleaning machines to vans, buses, trucks, fire engines and ambulances. First-hand descriptions of how, and why, some of the company's most successful products such as the Dart, Trident and Enviro buses evolved. It explains why their once market-leading fire engines are no longer made. It also analyses the reasons why some products were less successful and explores what happened to parts of the company that were sold over the years.

Finally, the company's future opportunities and challenges are considered. The author, Andy Goundry, has not only drawn on his own personal experience of almost twenty years of employment with the company but he has drawn on what is left of the company archives, private collections and first-hand accounts, to produce this book as a salutation of over 125 years of continuous manufacturing.
