In the modern world, why do we still resort to speculation? Advances in scientific and statistical reasoning are supposed to have provided greater certainty in making claims about the future. Yet we constantly spin out scenarios about tomorrow, for ourselves or for entire societies, with flimsy or no evidence. Insubstantial speculations—from utopian thinking to high-risk stock gambles—often provoke fierce backlash, even when they prove prophetic for the world we come to

inhabit. Why does this hypothetical way of thinking generate such controversy? In this cultural, literary, and intellectual history, Gayle Rogers traces debates over speculation from antiquity to the present. Celebrated by Boethius as the height of humanity's mental powers but denigrated as sinful by John Calvin, speculation eventually became central to the scientific revolution's new methods of seeing the natural world. In the nineteenth century, writers such as Jane Austen used the concept to diagnose the marriage market, redefining speculation for the purpose of social critique. Speculation fueled the

development of modern capitalism, spurring booms, busts, and bubbles, and recently artificial intelligence has automated the speculation previously done by humans, with uncertain and troubling consequences. Unraveling these histories and many other disputes, Rogers argues that what has always been at stake in arguments over speculation, and why it so often appears so threatening, is the authority to produce and control knowledge about the future. Recasting centuries of contests over the power to anticipate tomorrow, this book reveals the crucial role speculation has played in how

we create—and potentially destroy—the future.

The Sabbath-Lord's Day controversy exists because of a lack of faithful hermeneutics and attempts to validate denominational traditions with Scripture. Terrence O'Hare has studied this topic for a decade and presents his findings with the hope of attaining a consensus among professing Christians. The Sabbath Complete is thoroughly researched and comprehensive in its scope. In a readable and instructional manner O'Hare analyzes the full range of biblical texts on this topic, two millennia of church history, and literature from Jewish, Catholic, and many Protestant varieties, thus providing a comprehensive and unique answer that should appeal to a wide range of interested readers.

This updated Fourth Edition provides comprehensive coverage of the biology of gynecologic cancer, the therapeutic modalities available, and the diagnosis and treatment of site-specific malignancies. Because of the importance of multimodality treatment, the site-specific chapters are co-authored by a surgical oncologist, a medical oncologist, a radiation oncologist, and a pathologist. A significant portion of this edition focuses on monoclonal antibodies, vaccines, and gene directed therapies and how they can greatly improve treatment outcomes. A new chapter on end-of-life care is also included. Three distinguished new editors—Richard R. Barakat, MD, Maurie Markman, MD, and Marcus E. Randall, MD—now join the editorial team.
