Legal Translation

provides a

groundbreaking

investigation of the

issues found in legal

translation between

Arabic and English.

Drawing on a

contrastive-

comparative approach,

it analyses parallel

authentic legal

documents in both

Arabic and English to

examine the features

of legal discourse in

both languages and

uncover the different

translation techniques

used. In so doing, it

addresses the following

questions: What are

the features of English
and Arabic legal texts?

What are the

similarities and

differences of English

and Arabic legal texts?

What are the difficult

areas of legal

translation between

English and Arabic

legal texts? What are

the techniques for

translating these

difficult areas on the

lexical and syntactic

levels? Features

include: A thorough

description of the

features of legal

translation in both

English and Arabic,

drawing on empirical

new research, corpus

data analysis and

strategic two-way

comparisons between

source texts and target

texts Coverage of a

broad range of topics

including an outline of

the chosen framework

for data analysis, a

historical survey of legal discourse developments in both Arabic and English and detailed analyses of legal literature at both the lexical and syntactic levels Attention to common areas of difficulty such as Shariah Law terms, archaic terms and model auxiliaries Many examples and excerpts from a wide selection of authentic legal documents, reinforced by practical discussion points, exercises and practice drills to encourage active engagement with the material and opportunities for hands-on learning. Wide-ranging, scholarly and thought-provoking, this will be a valuable resource for advanced undergraduates and postgraduates on Arabic, Translation

Studies and Comparative Linguistics courses. It will also be essential reading for translation professionals and researchers working in the field.

'We've left a lot of men in Borneo - know what

I mean?' With their SAS trainer's warnings ringing in their ears, the naturalist, Redmond O'Hanlon, and the poet, James Fenton, set out to rediscover the lost rhinoceros of Borneo. They were loaded with enough back-breaking kit to survive two months in a steaming 95° (in the shade) jungle of creeping, crawling, biting things. O'Hanlon could also rely on his encyclopaedic knowledge of the region's flora and fauna, and had read-up on how to avoid being eaten by anything (stick your thumbs in a crocodile's eyes, if you have time). And yet they proceeded to have an adventure that neither O'Hanlon, nor his friend, nor even his guides were remotely

prepared for...

'Consistently exciting, often funny, and erudite without ever being overwhelming' Punch.
